Overview This model has a wire rope type grinding table where the bottom of the table slide way travels along the top of the saddle way. Since both slide ways are in full contact along the entire travel distance, it gives adequate support to the grinding process.

SG-618 | Sharp Industries Inc.

The KOL-618 High Precision Surface Grinder has longitudinal and cross slide ways that are precision handground and then laminated with Turcite-B. This provides a smooth, even travel with low wear. A full support system maintains accuracy during table reversing and full length of travel. Main components include base, column and saddle.

K.O. Lee 618 Surface Grinder - LeBlond Ltd.

The perfect smaller capacity hydraulic surface grinder. Rugged base and column construction assures rigidity and stability for coarse and fine grinding needs. Extended saddle longitudinal ways reduce overhang for prolonged machine life and accuracy. Hand scraped double vee table ways.

About Reid Precision Surface Grinders. Leland-Gifford Inc. purchased the assets and rights of the Reid Surface Grinder Line in December 2003, and moved the assets from Dexter, Maine to Akron, Ohio in January 2004. The Reid line consists of manual and hydraulic surface grinders smaller than the Gallmeyer line.

Harig Tech Support - JDS Technical Support

The 618H is a hand feed grinder which may or may not be a roller way and it is much newer machine, probably from the late 1950's to 1980's. These grinders had enclosed ways and a 1 horsepower Pope or Excello cartridge spindle as typical with many other modern grinders of this size. Quick Navigation General Top

KGS-618 – Kent USA Parts

Just brought home a Harig 618 surface grinder and discovered it is not set up for a 1" wide wheel so if anyone can help me figure out how to change it over from a 1/2" wide wheel to a 1" wide wheel I'd appreciate it. Also, when you start the machine the only way the machine will keep running is if you hold the emergency stop button 'out'.
