and in pathology laboratories, has been developed by a working party convened by the International Agency for Research on Cancer / WHO. ICD-O is a dual classification with coding systems for both topography and morphology. The book has five main sections. The first provides general instructions for

using the coding systems and gives rules for their implementation in tumour registries and pathology laboratories. Section two includes the numerical list of topography codes, which remain unchanged from the previous edition. The numerical list of morphology codes is presented in the next

tumour or cell type by histology, behaviour, and grade. Revisions in the morphology section were made in consultation with a large number of experts and were finalised after field-testing in cancer registries around the world. The alphabetical index gives codes for both topography and morphology and

includes selected  
tumour-like lesions and  
conditions. A guide to  
differences in  
morphology codes  
between the second and  
third editions is  
provided in the final  
section, which includes  
lists of all new code  
numbers, new terms and  
synonyms added to  
existing code  
definitions, terms that
