The series of International Conferences on Extending Database Technology (EDBT) is an established and prestigious forum for the exchange of the latest research results in data management. It provides unique opportunities for database researchers, practitioners, developers, and users to explore new ideas, techniques, and tools, and to exchange experiences.

Advances in Database Technology - EDBT 2006 | SpringerLink

EDBT 2000 is the seventh conference in a series dedicated to the advancement of database technology. This year's conference special theme, "Connect Millions of Users and Data Sources," underscores the importance of databases

for the information age that is dawning
with the new millennium.

Advances in Database Technology — EDBT 2000 | SpringerLink

Introduction Database technology is
currently being pushed by the needs of
new applications and pulled by the oppor-
tunities of novel developments in
hardware and systems architecture. The
invited paper, two panel sessions and 27
papers in this volume report on how the
technology is currently extending.

Technology, EDBT'96, held in Avignon, France in March 1996. The 31 full revised papers included were selected from a total of 178 submissions; also included are some industrial-track papers, contributed by partners of several ESPRIT projects.

Advances in Database Technology — EDBT '96 | SpringerLink

EDBT 2004 had the theme “new challenges for database technology,” with the goal of encouraging researchers to take a greater interest in the current exciting technological and application advancements and to devise and address new research and development directions for database technology. From its early days, database technology has been challenged and advanced by new uses and applications, and it continues to evolve along with application requirements and hardware advances.
