Biological anthropology comprises five general subdisciplines: human evolution, primatology, human genetics, the study of human physical growth, and human ecology. The first two subdisciplines have sometimes been termed ' physical anthropology ' in contrast to the second three as ' human biology ' ; ' biological anthropology ' embraces both.

Biological Anthropology Essay Study Guide With Answers

Biological Anthropology is the study of human biology within the framework of evolution. There are four subfields of Biological Anthropology; genetics, human variation, paleoanthropology, and primatology. Primatology is the study of non-human primates and I find it the most interesting of the four subfields. The study of Primatology focuses on the biological and psychological aspects of non-human primates.
