The biological features of human beings are now measured, observed, and understood in ways never before thought possible, defining norms, establishing standards, and determining average values of human life. While the notion of biopolitics has been linked to everything from rational decision-making and the democratic organization of social life to eugenics and racism, Thomas Lemke offers the very first systematic overview of the history of the notion of ...

Biopolitics is an intersectional field between human biology and politics. It is a political wisdom taking into consideration the administration of life and a locality ' s populations as its subject. To quote Michel Foucault, it is "to ensure, sustain, and multiply life, to put this life in order.". The term was coined by Rudolf Kjell é n, a political scientist who also coined the term ...
