Simply speaking, for Chinese government, domestic demand is the fundamental impetus for the country's development, and the greatest potential for expanding domestic demand lies in urbanization. Chinese government is expecting the more free-spending urbanites to help drive a more vibrant economy, helping wean China off its present reliance on unsustainable investment-heavy growth.

Urbanization in China - NOLASIA

After years of development, China is accelerating the push for developing a new type of urbanization. According to this year's Government Work Report, the country will begin the renovation of 39,000 old urban residential communities and support the upgrading of plumbing and wiring and the installation of elevators in old residential buildings.

Expo to highlight China's smart urbanization development ...

Although in China urbanization has occurred later, faster, and more massively than in Latin America, both cases imply a large migration of rural inhabitants to urban areas. In China and Latin America, the move to urban centers has meant significant social and economic improvement for the migrating population. In parallel, there has been a significant increase in the demand for urban services, often beyond the capacity of national and subnational governments.
