Concept Of Jatharagni In Ayurveda Jatharagni is the name given in Ayurveda, the sister science of yoga, for the digestive fire in the body that is responsible for metabolising food. It is said to be located in the lower stomach, duodenum, small intestine and pancreas, and is regarded by some as a god within the body.

Concept Of Jatharagni In Ayurveda A Patho Physiological Study

Jatharagni, Dhatwagni, and the Thyroid Gland The Sanskrit word agni (root ag, to move tortuously), in common language, means fire. In the Western schools of Ayurveda it is commonly understood as “digestive fire” implying its correlation with the various digestive juices of the stomach, small intestines and related exocrine glands.

Ayurveda

1.1. Ushma / Jatharagni / Pachakagni : (Digestive Enzymes) According to . Ayurveda, science, our body is made up of seven basic dhatus, and three doshas. To nourish that dhatus, ahar rasa, is very important. Ahar rasa, is produced by the ahara (food) with the help of Jatharagni.

AHARA VICHARA: AYURVEDIC CONCEPT OF DIET

Jatharagni separates food material into the sara (essence portion) and kitta (waste products) in the human body. Jatharagni is also classified into four categories according to its performance of digestion in the human being. Vishmagagni (Variable): Here the digestive fire is disturbed by vata. Because of variability in vata, there are episodes of alternating cycles of strong appetite with loss of appetite and forgetfulness to consume foods.
