After weathering the global financial crisis of 2009, Taiwan's export-oriented economy took another hit in 2015, mainly due to the weak global demand for consumer electronics products, coupled with the falling price of crude oil. Taiwan's economy grew only 0.81 percent and its overall trade volume decreased by 13.2 percent in 2015.

questions Concise notes and
questions that highlight the central
problems in each topic area Multiple
practice exercises in every chapter
designed to enable both student
review and practice-oriented teaching
Integrated treatment of rules and
considerations relating to copyright
due diligence, licensing, and
enforcement Comparative materials
that situate the U.S. copyright regime
in its global context

Crossroads in New Media, Identity and
Law is a compilation of essays on the
nexus of new information and
communication technologies, cultural
identity, law and politics. The essays
provoke timely discussions on how
these different spheres affect each
other and co-evolve in our increasingly
hyper-connected and globalized world.

Featuring specially commissioned chapters from experts in the field of media and communications law, this book provides an authoritative survey of media law from a comparative perspective. The handbook does not simply offer a synopsis of the state of affairs in media law jurisprudence, rather it provides a better understanding of the forces that generate media rules, norms, and standards against the background of major transformations in the way information is mediated as a result of democratization, economic development, cultural change, globalization and technological innovation. The book addresses a range of issues including: Media Law and Evolving Concepts of Democracy
Network neutrality and traffic

Online Library Copyright Global Info Economy 2010

management Public Service

Broadcasting in Europe Interception of Communication and Surveillance in Russia State secrets, leaks and the media A variety of rule-making institutions are considered, including administrative, and judicial entities within and outside government, but also entities such as associations and corporations that generate binding rules. The book assesses the emerging role of supranational economic and political groupings as well as non-Western models, such as China and India, where cultural attitudes toward media freedoms are often very different. Monroe E. Price is Director of the Center for Global Communication Studies at the Annenberg School for the University of Pennsylvania and Joseph and Sadie Danciger Professor of Law and

Director of the Howard M. Squadron Program in Law, Media and Society at the Cardozo School of Law. Stefaan Verhulst is Chief of Research at the Markle Foundation. Previously he was the co-founder and co-director, with Professor Monroe Price, of the Programme in Comparative Media Law and Policy (PCMLP) at Oxford University, as well as senior research fellow at the Centre for Socio Legal Studies. Libby Morgan is the Associate Director of the Center for Global Communication Studies at the Annenberg School for the University of Pennsylvania.

Widespread file sharing has led content industries – publishers and distributors of books, music, films, and software – to view their customers as growing threats to their survival.

Online Library Copyright Global Info Economy 2010

Content providers and their allies, especially the U.S. government, have pushed for stronger global copyright policies through international treaties and domestic copyright reforms. Internet companies, individuals, and public-interest groups have pushed back, with massive street protests in Europe and online “internet blackouts” that derailed the 2012 U.S. Stop Online Piracy Act (SOPA). But can citizens or smaller countries really stand in the way of the U.S. copyright juggernaut? To answer this question, Copyfight examines the 1996 World Intellectual Property Organization internet treaties that began the current digital copyright regime. Blayne Haggart follows the WIPO treaties from negotiation to implementation from the perspective of three countries: the United States, Canada,

Online Library Copyright Global Info Economy 2010

and Mexico. Using extensive interviews with policymakers and experts in these three countries, Haggart argues that not all the power is in the hands of the U.S. government. Small countries can still set their own course on copyright legislation, while growing public interest in copyright issues means that even the United States might move away from ever-increasing copyright protection.

The video game industry is enjoying a boom period worldwide. Intellectual property (IP) – and in particular copyright – underpins the continuing success of the industry, yet the understanding and use of IP instruments of protection can remain a challenge. This publication outlines the practical business and legal issues

Online Library Copyright Global Info Economy 2010

relevant for video game developers and will thus improve their ability to get the most out of the IP system. Topics covered include: licensing agreements, music, distribution, mobile, regulation, confidentiality agreements, and more.

The book examines the correlation between Intellectual Property Law – notably copyright – on the one hand and social and economic development on the other. The main focus of the initial overview is on historical, legal, economic and cultural aspects. Building on that, the work subsequently investigates how intellectual property systems have to be designed in order to foster social and economic growth in developing countries and puts forward theoretical and practical solutions that should be

Online Library Copyright Global Info Economy 2010

considered and implemented by policy makers, legal experts and the World Intellectual Property Organization (WIPO).

Origins and early development; Modern systems and principles of copyright; International agreements and structure; Representative national copyright system; Challenges to copyright: new technologies and media; Policies for the information age.

As the world rapidly moves online, sectors from management, industry, government, and education have broadly begun to virtualize the way people interact and learn. Virtual Learning Environments: Concepts, Methodologies, Tools and Applications is a three-volume compendium of the

Online Library Copyright Global Info Economy 2010

Supplement
latest research, case studies, theories, and methodologies within the field of virtual learning environments. As networks get faster, cheaper, safer, and more reliable, their applications grow at a rate that makes it difficult for the typical practitioner to keep abreast. With a wide range of subjects, spanning from authors across the globe and with applications at different levels of education and higher learning, this reference guide serves academics and practitioners alike, indexed and categorized easily for study and application.

Comprehensive and up-to-date, this 2007 Statutory Supplement is the perfect compliment to any copyright law casebook, including the authors' own Copyright in a Global Information Economy, now in its Second Edition.
