Security is a major consideration in the way that business and information technology systems are designed, built, operated, and managed. The need to be able to integrate security into those systems and the discussions with business functions and operations exists more than ever. This IBM® Redbooks® publication explores concerns that characterize security requirements of, and threats to, business and information technology (IT) systems. This book identifies many business drivers that illustrate these concerns, including managing risk and cost, and compliance to business policies and external regulations. This book shows how these drivers can be translated into capabilities and security needs that can be represented in frameworks, such as the IBM Security Blueprint, to better enable enterprise security. To help organizations with their security challenges, IBM created a bridge to address the communication gap between the business and technical perspectives of security to enable simplification of thought and process. The IBM Security Framework can help you translate the business view, and the IBM Security Blueprint describes the technology landscape view. Together, they can help bring together the experiences that we gained from working with many clients to build a comprehensive view of security capabilities and needs. This book is intended to be a valuable resource for business leaders, security officers, and consultants who want to understand and implement enterprise security by considering a set of core security capabilities and services.

Francis Spufford's Unapologetic is a wonderfully pugnacious defense of Christianity. Refuting critics such as Richard Dawkins, Sam Harris, and the "new atheist" crowd, Spufford, a former atheist and Fellow of the Royal Society of Literature, argues that Christianity is recognizable, drawing on the deep and deeply ordinary vocabulary of human feeling, satisfying those who believe in it by offering a ruthlessly realistic account of the grown-up dignity of Christian experience. Fans of C. S. Lewis, N. T. Wright, Marilynne Robinson, Mary Karr, Diana Butler Bass, Rob Bell, and James Martin will appreciate Spufford's crisp, lively, and abashedly defiant thesis. Unapologetic is a book for believers who are fed up with being patronized, for non-believers curious about how faith can possibly work in the twenty-first century, and for anyone who feels there is something indefinably wrong, literalistic, anti-imaginative and intolerant about the way the atheist case is now being made.

Brothers Francis and Johnny Billington take issue with history's account of their troublemaking ways aboard the Mayflower and in the New World, as they tell their side of the story to Standish Brewster, professor of Pilgrimology at Plymouth University.

Blending three primary colors to create the full spectrum of hues is more than a test of an artist's skill; it's a distinctive way to create stunning and original paintings. In this hands-on course in the art of color mixing, prize-winning artist Stan Kaminski takes the reader step by step through 20 demonstration paintings created with just three colors—alizarin crimson, ultramarine blue, and yellow ochre—plus white. Using gouache in both watercolor and oil-painting styles, he offers painters of all skill levels the benefit of his professional guidance and inspiration.

"...a definite major contribution to our understanding of what makes great teachers and how to structure a student centered classroom that excites and engages students and their parents in learning. By releasing teachers' voices willingness to break the silence---the text challenges and explodes the myth of the anti-intellectual teacher by the reader journeying with teachers way beyond the drab dribble of professional staff underdevelopment to becoming warrior intellectuals in charge of their own destinies thus laying a foundation for student emulation. It also reveals teachers as life-long learners with ans insatiable thirst for knowledge."---Winthrop R. Holder, social studies teacher and author of Classroom Calypso: Giving Voice to the Voiceless Exit Narratives examines what constitutes good teaching and engaged learning and how to use this knowledge to support teachers in their efforts to create learning environments that encourage academic mastery and nourish students as social beings. The authors explore a range of issues: why they became teachers, their first years of teaching, what worked for them, the micropolitics of teacher interactions, becoming proficient teachers, as well as their last year of teaching and what they did next. These former teachers took a stand in their careers to create a better environment for both teaching and learning.

Harris elucidates the important philosophical implications of the Anthropic Principle. Tracing the continuous development of the principle from physics through biology and psychology, he examines the case for the thesis that intelligent life is necessarily involved from the very beginning of physical reality and that the entire process of natural evolution comes to consciousness of itself in the human mind.
