The Future of Drone Technology - Cloud Employee

00:53. The aviation sector has struggled throughout the COVID-19 pandemic, as commercial and business flights nearly ground to a halt as countries across the world enforced coronavirus restrictions and closed their borders. Andrew Charlton, the managing director of Aviation Advocacy, spoke to CGTN Europe about the future of the global sector and said that, with the adaptation of the sector to a new normal, cargo, drones and even air taxis could potentially be the future route for aviation.

Are drones and flying taxis the future of aviation? - CGTN

"Drones and the Future of Armed Conflict is a welcome addition to the growing literature on drone warfare, bringing together specialists on strategy, human rights, ethics, and law to discuss the implications of drone use for each of these areas. In particular, Cortright and Fairhurst make a forceful and convincing case for why drones or a militarized strategy more generally should not be central to our counterterrorism policy."--Sarah Kreps, Cornell University
