The Diamond pattern is a rare, but reliable chart pattern. Diamond chart reversals rarely happen at market bottoms, it most often occurs at major tops and with high-volume. Bulkowski's (2005) research states that the diamond bottom breaks upward 69% of the time. Bulkowski emphasizes that a diamond bottom with a breakout move downward is ranked as being one the best performing patterns. You ...

In this revised and expanded second edition of the bestselling Encyclopedia of Chart Patterns, Thomas Bulkowski updates the classic with new performance statistics for both bull and bear markets and 23 new patterns, including a second section devoted to ten event patterns. Bulkowski tells you how to trade the significant events -- such as quarterly earnings announcements, retail sales, stock upgrades and downgrades -- that shape today's trading and uses statistics to back up his approach. This comprehensive new edition is a must-have reference if you're a technical investor or trader. Place your order today. "The most complete reference to chart patterns available. It goes where no one has gone before. Bulkowski gives hard data on how good and bad the patterns are. A must-read for anyone that's ever looked at a chart and wondered what was happening." -- Larry Williams, trader and author of Long-Term Secrets to Short-Term Trading

The market's bestselling and most comprehensive reference on chart patterns, backed by statistics and decades of experience When the smart money trades the securities markets, they leave behind financial footprints. Combine enough footprints together and you have a trail to follow. That trail becomes what's called a chart pattern. Encyclopedia of Chart Patterns, Third Edition expands upon Bulkowski's immensely popular Second Edition with fully revised and updated material on chart patterns. Whether you're new to the stock market or an experienced professional trader, use this book as a reference guide to give you an edge. Within the pages of this book, you'll learn how to identify chart patterns, supported by easy-to-understand performance statistics describing how well a pattern works, what the failure rate is, and what special quirks suggest better future performance. You'll discover how often a stop loss order will trigger at various locations within a chart pattern, how the chart pattern's performance has evolved over the past three decades, and how to profit from failure by trading busted patterns. (Keller, TX), an active investor since 1981, is the author of the highly acclaimed Encyclopedia of Chart Patterns (Wiley: 0471295256) as well as numerous articles for Technical Analysis of Stocks & Commodities. Trained as a computer engineer, Bulkowski worked for over a decade at Tandy Corporation. Prior to that, he worked on the Patriot air defense system for Raytheon. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered-some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future.

Take chart patterns beyond buy triggers to increase profits and make better trades Chart Patterns: After the Buy goes beyond simple chart pattern identification to show what comes next. Author and stock trader Thomas Bulkowski is one of the industry's most respected authorities in technical analysis; for this book, he examined over 43,000 chart patterns to discover what happens after you buy the stock. His findings are detailed here, to help you select better buy signals, avoid disaster, and make more money. Bulkowski analyzed thousands of trades to identify common paths a stock takes after the breakout from a chart pattern. By combining those paths, he discovered the typical routes a stock takes, which he calls configurations. Match your chart to one of those configurations and you will know, before you buy, how your trade will likely perform. Now you can avoid potentially disastrous trades to focus on the big winners. Each chapter illustrates the behavior of a specific pattern. Identification guidelines help even beginners recognize common patterns, and expert analysis sheds light on the period of the stock's

behavior that actually affects your investment. You'll discover ideal buy and sell setups, how to set price targets, and more, with almost 370 charts and illustrations to guide you each step of the way. Coverage includes the most common and popular patterns, but also the lesser-known ones like bad earnings surprises, price mirrors, price mountains, and straight-line runs. Whether you're new to chart patterns or an experienced professional, this book provides the insight you need to select better trades. Identify chart patterns Select better buy signals Predict future behavior Learn the best stop locations Knowing the pattern is one thing, but knowing how often a stop will trigger and how often you can expect a stock to reach its target price is another matter entirely—and it impacts your trade performance immensely. Chart Patterns: After the Buy is the essential reference guide to using chart patterns effectively throughout the entire life of the trade.

Following in the footsteps of author Thomas Bulkowski's bestselling Encyclopedia of Chart Patterns—and structured in the same way—this easy-to-read and -use resource takes an in-depth look at 103 candlestick formations, from identification guidelines and statistical analysis of their behavior to detailed trading tactics. Encyclopedia of Candlestick Charts also includes chapters that contain important discoveries and statistical summaries, as well as a glossary of relevant terms and a visual index to make candlestick identification easy.
