Microwave and RF Design: Modules focuses on the design of systems based on microwave modules. The use of modules has become increasingly important in RF and microwave engineering for rapidly realizing high performance microwave systems. When integration is ultimately to be used, building a system up using modules provides a rapid means of prototyping and testing system concepts. A wide variety of RF modules including amplifiers, local oscillators, switches, circulators, isolators, phase detectors, frequency multipliers and dividers, phase-locked loops, and direct digital synthesizers are considered. Detailed design strategies for synthesizing filters based on parallel coupled lines are presented. The reader will gain an appreciation of design by synthesis. This book is suitable as both an undergraduate and graduate textbook, as well as a career-long reference book. Key Features * The fourth volume of a comprehensive series on microwave and RF design * Open access ebook editions are hosted by NC State University Libraries at https://repository.lib.ncsu.edu/handle/1840.20/36776 * 23 worked examples * An average of 21 exercises per chapter * Answers to selected exercises * 6 case studies illustrating design procedures * Emphasis on synthesis as well as building a rich library of microwave functions * A companion book, Fundamentals of Microwave and RF Design, is suitable as a comprehensive undergraduate textbook on microwave engineering

Exercise problems in each chapter.

In this remarkable new photographic history, local historian and photographer Dennis LeBeau presents a heartwarming tale of life in the Brookfields at the turn of the century. The photographs in this collection are those of William Bullard, an itinerant photographer in the 1890s and early 1900s from North Brookfield, whose work has never before been published in book form. The story of Bill Bullard's life and photographic legacy are dramatically revealed in this fascinating glimpse into the past. After the photographer's untimely and tragic demise, the rich photographic archives of Bill Bullard were carefully preserved by his brother, Charlie Bullard, and three generations of the neighboring Gaudette family. Dennis LeBeau has individually reprinted each image in this collection from its original glass plate negative. Mr. LeBeau's researched and well-informed captions accompany the photographs in Bullard's collection, creating a comprehensive historic portrait of both the Brookfields and the Bullard family.

Which types of regulatory reinvention work and which don't? This book identifies innovative regulatory best practice internationally in a number of specific contexts, providing policy prescriptions which would better enable agencies to fulfil their regulatory missions.
