[Books] Governing For Sustainable Urban Development

Urbanisation leads to an increased impact on the environment; the 'ecological footprint' of cities is spreading. The impact of growth on all areas of society must be acknowledged. Sustainable growth requires an evolution in the way urban areas carry out their activities such as resource use and the movement of people and goods. The physical infrastructure in addition to social and economic processes must evolve to acknowledge the challenges of growth.

What is Sustainable Urban Development

Governing for sustainable urban development. [Yvonne Rydin] -- "Achieving urban sustainability is amongst the most pressing issues facing planners and governments. This book is the first to provide a cohesive analysis of sustainable urban development and to ...

Governing for sustainable urban development (Book, 2010) ...

Urban planning, also known as regional planning, town planning, city planning, or rural planning, is a technical and political process that is focused on the development and design of land use and the built environment, including air, water, and the infrastructure passing into and out of urban areas, such as transportation, communications, and distribution networks.

Urban planning -- Wikipedia

From 2018 to 2020, all Belgian-supported NGOs joined the co-operation scheme related to building a sustainable environment. The scheme was named " From green offices to the sustainable development of the entire environment " . These organisations learned and changed from the private and working habits of their staffs.
