Horse Breeding and Management: World Animal Science Series ...

Sadly, in the UK there are now thousands more horses than there are good homes. Read more about the horse crisis here. Prices are at desperately low levels, and many horses are being abandoned or neglected. Undoubtedly there are a number of different groups contributing to the breeding of horses in the UK.

Horse breeding and management
(Book, 1992) [WorldCat.org]

American Saddlebred is an American horse breed originated in Kentucky. The breed resulted from the cross-breeding of the Narragansett Pacer, the Morgan, and the Thoroughbred. A horse breed is suited to such disciplines as hacking, dressage, hunting, show jumping, trail riding, and great endurance. The American Saddlebred stands at around 16

Although people have many reasons for breeding a horse, there are some important factors that all breeders should consider before getting started. The mare's age is important, as well as the number...

Breeding: Best Mare Management Practices – The Horse

For breeding, the stallion should be fitted with a well-adjusted halter with large rings that allow the chain shank to freely slide. During breeding, the stallion should be controlled adequately to prevent injury to the mare. After breeding, the penis can be rinsed with warm water to reduce

pony breeds, and also includes terms for types of horse that are not necessarily standardized breeds but are often labeled as breeds. While there is no scientifically accepted definition of the term "breed", a breed is generally defined as having distinct true-breeding characteristics over a number of generations. Its members may be called "purebred".

List of horse breeds - Wikipedia

Careful attention to the management of breeding horses in ways which enable them to express normal behaviours as fully as possible within the constraints of needing to avoid injury to horses and people would improve welfare, both by reducing negative

horse mating donkey - Bing video
Horse breeding is reproduction in
horses, and particularly the human-
directed process of selective
breeding of animals, particularly
purebred horses of a given breed.
Planned matings can be used to
produce specifically desired
characteristics in domesticated
horses. Furthermore, modern
breeding management and
technologies can increase the rate
