Diagnosis and treatment can help prevent serious, life-threatening complications of STDs including infertility, ectopic pregnancy, spontaneous abortion, chronic pelvic pain, and chronic infections. At the same time, emergency clinicians must be aware of growing antibiotic resistance, especially in the treatment of gonorrhoea.

Emergency Department Diagnosis and Treatment of Sexually ...  
Three hospital emergency rooms (ERs) routinely referred all cases of cellulitis requiring outpatient intravenous antibiotics, to a central ER-staffed cellulitis clinic. We performed a retrospective cohort study of all patients seen by the ER clinic in the last 4months preceding a policy change (ER management cohort [ERMCC]) (n=149) and all those seen in the first 3months of a new policy of automatic referral to an infectious disease (ID) specialist-supervised cellulitis clinic (ID management ...

Infectious diseases specialist management improves ...  
Infectious Diseases Emergencies is a compact reference that summarizes the key topics of those infectious disease processes that are most commonly seen in emergency departments, clinics, and urgent care facilities. The opening section reviews principles of infectious disease management and general management of severe infections in acute and emergency environments.

H. B. is a member of the Advisory Committee on Immunization Practices at CDC; is an ex-officio member of the Committee on Infectious Diseases at AAP; and is an ...

Clinical Practice Guidelines by the Infectious Diseases ...  
Abstract. Background/objective: Traditional sources cite seasonal patterns for common infectious diseases, often based on microbiologic data, but little is known about cyclical trends in clinically diagnosed infectious conditions in the emergency department (ED). We leveraged the publicly available Nationwide Emergency Department Sample database to measure the seasonality of the most common pediatric infectious diseases diagnosed in US EDs.

Seasonality of Common Pediatric Infectious Diseases  
The novel coronavirus disease 2019 (COVID-19) outbreak has led to major reorganizations of emergency departments (EDs) to face the significant increase of patients with suspected severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). 1 The clinical description of hospitalized patients has been reported in the literature,2, 3, 4, 5, 6 but to our knowledge no study has focused on clinical and diagnostic findings in the ED setting.

Accuracy of Emergency Department Clinical Findings for ...
