Jenis – jenis Antropologi. Antropologi dibagi menjadi beberapa cabang secara khusus yaitu antropologi fisik dan antropologi budaya. Cabang antropologi tersebut masih dibagi lagi menjadi sub bidang, seperti dibawah ini: 1. Antropologi Fisik. Menurut Haviland, antropologi fisik mempelajari manusia sebagai organisme biologis.

In this seminal book, Krumer-Nevo introduces the Poverty-Aware Paradigm: a radical new framework for social workers and professionals working with and for people in poverty. The author defines the core components of the Poverty-Aware Paradigm, explicates its embeddedness in key theories in poverty, critical social work and psychoanalysis, and links it to diverse facets of social work practice. Providing a revolutionary new way to think about how social work can address poverty, she draws on the extensive application of the paradigm by social workers in Israel and across diverse poverty contexts to provide evidence for the practical advantages of integrating the Poverty-Aware Paradigm into social work practices across the globe.

A new edition of Karl Mannheim's classic work in which the concepts of 'ideology' and 'utopia' are examined as opposing and dominant societal influences.

"While violations of human rights continue all over the world, Western criticisms and campaigns have too often presented them either in a Cold War context or with what some people in the South see as an anti-Third World bias. This not only undermines their political impact, but implies that the human rights record of Western societies is almost blameless." "Jamil Salmi's significant contribution in this book is to develop a new conceptualisation of human rights violations. This goes beyond the Western liberal tradition and provides a broader classification, applicable to any society - be it capitalist or socialist, industrialised or Third World. Drawing on impeccably authoritative sources, including Amnesty International, this plain-speaking and powerful argument illuminates not only cases of clear and direct violence, such as torture, but also forces our attention to situations where violence is disguised and indirect: the threat of environmental damage to human life, the repressive violence of racism and sexism, and the alienating and dehumanising effects of unemployment."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Shows how changes in work, family structure, women's roles, and other factors have caused people to become increasingly disconnected from family, friends, neighbors, and democratic structures--and how they may reconnect.

In the crowded field of climate change reports, 'WDR 2010' uniquely: emphasizes development; takes an integrated look at adaptation and mitigation; highlights opportunities in the changing competitive landscape; and proposes policy solutions grounded in analytic work and in the context of the political economy of reform.

This selection from Max Weber's writings presents his variegated work from one central focus, the relationship between charisma on the one hand, and the process of institution building in the major fields of the social order such as politics, law, economy, and culture and religion on the other. That the concept of charisma is crucially important for understanding the processes of institution building is implicit in Weber's own writings, and the explication of this relationship is perhaps the most important challenge which Weber's work poses for modern sociology. Max Weber on Charisma and Institution Building is a volume in "The Heritage of Sociology," a series edited by Morris Janowitz. Other volumes deal with the writings of George Herbert Mead, William F. Ogburn, Louis Wirth, W. I. Thomas, Robert E. Park, and the Scottish Moralists—Adam Smith, David Hume, Adam Ferguson, and others.

This book explores the role of the news media in promoting equitable economic development, and considers the obstacles it faces as a catalyst for change and growth. It examines the capacity of investigative journalism to scrutinise public policy and the activities of the corporate sector, to facilitate public access to information, expose corruption and weak governance and thus promote greater transparency and accountable government. It contains contributions from journalists, television and newspaper editors, economists and academics, as well as the winner of the Nobel Prize for Economics Joseph Stiglitz, and for Literature, Gabriel Garcia Marquez. A number of case studies examine the work of the media and the challenges they face in various countries including Thailand, Bangladesh, Egypt, Zimbabwe and the former Soviet Union.

Updated in its 13th edition, Joseph Devito's The Interpersonal Communication Book provides a highly interactive presentation of the theory, research, and skills of interpersonal communication with integrated discussions of diversity, ethics, workplace issues, face-to-face and computer-mediated communication and a new focus on the concept of choice in communication. This thirteenth edition presents a comprehensive view of the theory and research in interpersonal communication and, at the same time, guides readers to improve a wide range of interpersonal skills. The text emphasizes how to choose among those skills and make effective communication choices in a variety of personal, social, and workplace relationships

The end of the Cold War ushered in an age of American triumphalism best characterized by the "Washington Consensus:" the idea that free markets, democratic institutions, limitations on government involvement in the economy, and the rule of law were the foundations of prosperity and stability. The last fifteen years, starting with the Asian financial crisis, have seen the gradual erosion of that consensus. Many commentators have pointed to the emergence of a powerful new rival model: state capitalism. In state capitalist regimes, the government typically owns firms in strategic industries. Not beholden to private-sector shareholders, such firms are allowed to operate with razor-thin margins if the state deems them strategically important. China, soon to be the world's largest economy, is the best known state capitalist regime, but it is hardly the only one. In State Capitalism, Joshua Kurlantzick ranges across the world--China, Thailand, Brazil, Russia, South Africa, Turkey, and more--and argues that the increase in state capitalism across the globe has, on balance, contributed to a decline in democracy. He isolates some of the reasons for state capitalism's resurgence: the fact that globalization favors economies of scale in the most critical industries, and the widespread rejection of the Washington Consensus in the face of the problems that have plagued the world economy in recent years. That said, a number of democratic nations have embraced state capitalism, and in those regimes, state-backed firms like Brazil's Embraer have enjoyed considerable success. Kurlantzick highlights the mixed record and the evolving nature of the model, yet he is more concerned about the negative effects of state capitalism. When states control firms, whether in democratic or authoritarian regimes, the government increases its advantage over the rest of society. The combination of new technologies, the perceived failures of liberal economics and democracy in many developing nations, the rise of modern kinds of authoritarians, and the success of some of the best-known state capitalists have created an era ripe for state intervention. State Capitalism offers the sharpest analysis yet of what state capitalism's emergence means for democratic politics around the world.
