John B. Conway ' Preface to the Second Edition The most significant difference between this edition and the first is that the last chapter, Fredholm Theory, has been completely rewritten and simplified. The major contribution to this simplification was made by Hari Bercovici who showed me the most simple and elegant development of the Fredholm index I have seen. Other changes in this book ...

Fix a bounded open set G in the complex plane and let H be the Hilbert space of all analytic functions on G that are square integrable with respect to area measure on G . Define $S: H \rightarrow H$ by $(Sf)(z) = zf(z)$ for all f in H . I also have an interest in non-abelian approximation of operators on Hilbert space.
