This dissertation approaches the question of sustainability and its influence on company performance, with special focus on the manufacturing industry. In the contemporary production environment, manufacturing operations must take into account not only profit, but also environmental and social performance, in order to ensure the long-term development of the company. Companies have to decide whether they should allocate resources to environmental and social practices in order to improve their competitive advantage. Consequently, in decision-making processes concerning operations, it is important for companies to understand how to coordinate profit, people, and planet. The objective of this dissertation was to investigate the current situation regarding manufacturers’ sustainable initiatives, and to explore the relationship between these sustainable practices and companies’ performance, including financial performance, operational performance, innovation performance, environmental performance, and social performance. First of all, a structured literature review was conducted to identify sustainable factors considered to be important in the decision making of manufacturing operations. The findings were synthesized into a conceptual model, which was then adopted as the basis for designing the survey instrument used in this dissertation. Drawing on Global Reporting Initiative (GRI) reports, empirical research was performed to explore the relationship between environmental management practices and company performance. Interestingly, the findings showed that many environmental management practices had a strong positive impact on innovation performance. Sustainability disclosures and financial performance were further analyzed using extended data from the GRI reports. The results also showed that several sustainability performance indicators, such as product responsibility, human rights, and society, displayed a significant and positive correlation with return on equity in the sample companies. In order to further explore the research area and to verify these findings, a triangulation approach was adopted and new data were collected via a survey conducted among middle and large sample companies in the Swedish manufacturing industry. The results indicated that the sustainable improvement practices had a positive impact on company performance. Some environmental and social improvement practices had a direct and positive correlation with product and process innovation. Furthermore, findings suggested that better cooperation with suppliers on environmental work could help to strengthen the organizational green capabilities of the focal companies. When considering the company’s general approach to implementing sustainable practices, some interesting findings emerged. There were limited significant differences in sustainable practices when comparing different manufacturing sectors, and different countries and regions. However, the results showed that Swedish manufacturing companies often place higher priority on implementing economic and environmental sustainability practices than on social ones. This dissertation contributes to the literature on manufacturing sustainability. The study expands the understanding of how environmental, social, or economic perspectives as a triple bottom line can influence company performance and to a certain extent the supply chain. Identifying and understanding such relationships gives companies the opportunity to integrate sustainability into their manufacturing operations strategy in order to sustain their manufacturing operations over the long term.

The Spartan City State produced what is probably one of the most iconic and ruthless military forces in recorded history. They believed that military training and education began at birth. Post-World War II saw a shift to army tanks, fighter jets and missiles that would go on to fight the next huge battle in Northern Europe. Today, with the advent of unmanned systems, our hopes are attached to the idea that we can fight our battles with soldiers pressing buttons in distant command centres. However, soldiers must now be highly trained, super strong and have the intelligence and mental capacity to handle the highly complex and dynamic military operating environment. It is only now as we progress into the twenty-first century that we are getting closer to realising the Spartan ideal and creating a soldier that can endure more than ever before. This book provides the first comprehensive and unifying analysis of the moral, legal and social questions concerning military human enhancement, with a view toward developing guidance and policy that may influence real-world decision making.

Endorsed by Cambridge International Examinations, the books cover the Cambridge syllabus (0455).

On a cold February night in 1991, a group of soldiers and officers of the Indian Army pushed their way into two villages in Kashmir, seeking out militants assumed to be hiding there. They pulled the men out of their homes and subjected many to torture, and the women to rape. According to village accounts, as many as 31 women were raped. Twenty-one years later, in 2012, the rape and murder of a young medical student in Delhi galvanized a protest movement so widespread and deep that it reached all corners of the world. In Kashmir, a group of young women, all in their twenties, were inspired to re-open the Kunan-Poshpora case, to revisit their history and to look at what had happened to the survivors of the 1991 mass rape. Through personal accounts of their journey, this book examines questions of justice, of stigma, of the responsibility of the state, and of the long-term impact of trauma.

Studies in the Contract Laws of Asia provides an authoritative account of the contract law regimes of selected Asian jurisdictions, including the major centres of commerce where limited critical commentaries have been published in the English language. Each volume in the series aims to offer an insider’s perspective into specific areas of contract law - remedies, formation, parties, contents, vitiating factors, change of circumstances, illegality, and public policy - and explores how these diverse jurisdictions address common problems encountered in contractual disputes. A concluding chapter draws out the convergences and divergences, and other themes. All the Asian jurisdictions examined have inherited or adopted the common law or civil law models of European legal systems. Scholars of legal transplant will find a mine of information on how received law has developed after the initial adaptation and transplant process, including the mechanisms of and influences affecting these developments. At the same time, many points of convergence emerge. These provide good starting points for regional harmonization projects. Volume II of this series deals with contract formation and contracts for the benefit of third parties in the laws of China, India, Japan, Korea, Taiwan, Singapore, Malaysia, Hong Kong, Korea, Vietnam, Cambodia, Thailand, Indonesia, and Myanmar. Typically, each jurisdiction is covered in two chapters; the first deals with contract formation, while the second deals with contracts for the benefit of third parties.

Climate Change Law and Policy in the Middle East and North Africa Region provides an in-depth and authoritative examination of the guiding principles of climate change law and policy in the MENA region. This volume introduces readers to the latest developments in the regulation of climate change across the region, including the applicable legislation, institutions, and key legal innovations in climate change financing, infrastructure development, and education. It outlines participatory and bottom-up legal strategies—focusing on transparency, accountability, gender justice, and other human rights safeguards—needed to achieve greater coherence and coordination in the design, approval, financing, and implementation of climate response projects across the region. With contributions from a range of experts in the field, the collection reflects on how MENA countries can advance existing national strategies around climate change, green economy, and low carbon futures through clear and comprehensive legislation. Taking an international and comparative approach, this book will be of great interest to students, scholars, and practitioners who work in the areas of climate change, environmental law and policy, and sustainable development, particularly in relation to the MENA region.

Perspectives on the Security of Singapore: The First 50 Years explores the security of Singapore in the last 50 years and its possible trajectories into the future. This volume brings together the diverse perspectives of a team of academics with different expertise, ranging from history to political science to security studies with a common interest in Singapore. The book is further boosted by the recollections of key civil servants involved with foreign affairs and defence, such as S R Nathan, Peter Ho, Bilahari Kausikan and Philip Yeo. Contents:IntroductionPart 1.Singapore's Conception of Security (Ang Cheng Guan)National Security and Singapore: An Assessment (Norman Vasu and Bernard Loo)Deliquescent Security Threats: Singapore in the Era of Hyper-Globalisation (Alan Chong)Singapore and Global Governance: Free-Rider or Responsible Stakeholder? (Tan See Seng)The Challenge of Strategic Intelligence for the Singapore Armed Forces (Kwa Chong Guan)Desecuritisation and after Desecuritisation: The Water Issue in Singapore-Malaysia Relations (S R Joey Long)Singapore's Security in the Context of Singapore-Malaysia-Indonesia Relations (Bilveer Singh)Singapore's Relations with Malaysia and Indonesia (Theophilus Kwek and Joseph Chinyong Liow)International Missions of the Singapore Armed Forces: How Far Would You Go? (Katie Tan and Ong Wei-chong)Why the FPDA Still Matters to Singapore (Raif Emmers)Singapore in ASEAN's Quest toward a Security Community (Mely Caballero-Anthony)Singapore and the Great Powers (Khong Yuen Foon)The Changing Terrorist Threat Landscape in Singapore (Rohan Gunaratna)Managing Religious Diversity in Singapore: Context and Challenges (Mohammad Alami Musa and Mohamed Imran Mohamed Tali)Part 2.Personal ReminiscencesSafeguarding Singapore's Security: Defence and Diplomacy (S R Nathan)Organising for National Security—The Singapore Experience (Peter Ho)Pragmatic Adaptation, Not Grand Strategy: Shaped Singapore Foreign Policy (Bilahari Kausikan)Dr Goh Keng Swee and the Building of Singapore's Defence Industrial Capability (Philip Yeo)Conclusion: Strategic Certainties Facing Singapore in 2065 (Barry Desker) Readership: Undergraduate and graduate students, researchers and academics, and general public interested in security studies in general and in Singapore. Key Features:This is possibly the first scholarly collective effort/book on the subject of security of SingaporeThe contributors are academics within (and associated with) the S. Rajaratnam School of International Studies (RSIS), the only school cum think-tank that specialises in security issues in SingaporeThe contributors include former top civil servants who played a significant role in the shaping and conduct of Singapore's foreign and defence policiesKeywords:Security;Foreign Policy;Singapore

The Kingdom of Saudi Arabia has established itself as the twelfth-largest economy in the world, the largest West Asian economic power, world’s largest oil producer, and a strong and capable force in international politics, particularly in the Sunni Islamic world. However, at present it is at crossroads. Should it continue as a ‘kingdom’ or usher in the process of inclusive political representation? This volume answers such questions and explores how the state is coping with domestic, regional and global developments to remain relevant in the changing times. It provides a holistic overview of a slew of economic, political, cultural, military and security policy measures that have been initiated by the government. The work also offers a detailed analysis of Saudi Arabia’s relations with three significant powers—USA, China and India—and how they are evolving under new geopolitical and geostrategic dynamics. This book will interest strategists, policymakers, researchers and students of international relations, geopolitics, political science and political economy as well as the informed reader.
