John S. Hoff describes the provisions of Medicare that effectively prohibit Medicare beneficiaries from going outside Medicare and paying their physicians for care when they choose to do so. This issue has assumed new importance and public awareness with the enactment of section 4507 of the Balanced Budget Act of 1997. Mr. Hoff discusses technical issues of Medicare law and policy in the broader context of the personal autonomy of Medicare beneficiaries and the physicians who care for them. He describes the administrative policies that led to section 4507, analyzes the terms and operation of section 4507, and discusses the importance of the issue for Medicare beneficiaries and physicians, taxpayers, and all Americans concerned about their personal freedom.

Let's say you're the devil, and you want to corrupt the American republic. How would you go about it? According to David Hyman, you might create something like Medicare, the federal health care program for the elderly. Hyman submits that Medicare may be the greatest trick the devil ever played. Medicare feeds on the avarice of doctors and other providers, turns seniors into health care gluttons, and makes regions of the United States green with envy over the dollars showered on other regions. The program exploits the sloth of government officials to increase the tax burden on workers and drag down the quality of care for seniors. Medicare makes Democrats lust for socialized medicine, while its imperviousness to reform makes Republicans angrier and angrier. Most of all, Medicare allows its ideological supporters to bleat and preen their way to the heights of moral vanity. In the style of C.S. Lewis' *The Screwtape Letters*, Hyman writes that Medicare has "freed the self-interest of these mortals from its natural restraints. As a result, the seven deadly sins have blossomed." With epic political battles over Medicare and the future of limited government looming just over the horizon, Hyman uses satire to cast a critical eye on this mediocre government program.

America's healthcare system is at a crossroads, faced with rising costs, quality concerns, and a lack of patient control. Some blame market forces. Yet many troubles can be traced directly to pervasive government influence: entitlements, tax laws, and costly regulations. Consumer choice and competition deliver higher quality and lower prices in other areas of the economy. The authors conclude that removing restrictions can do the same for health care.

Details how legislators can return the federal government to the size and scope envisioned by the Founding Fathers.
