With Answer Key to All Questions. Chemistry students and homeschoolers! Go beyond just passing. Enhance your understanding of chemistry and get higher marks on homework, quizzes, tests and the regents exam with E3 Chemistry Review Book 2018. With E3 Chemistry Review Book, students will get clean, clear, engaging, exciting, and easy-to-understand high school chemistry concepts with emphasis on New York State Regents Chemistry, the Physical Setting. Easy to read format to help students easily remember key and must-know chemistry materials. Several example problems with solutions to study and follow. Several practice multiple choice and short answer questions at the end of each lesson to test understanding of the materials. 12 topics of Regents question sets and 3 most recent Regents exams to practice and prep for any Regents Exam. This is the Home Edition of the book. Also available in School Edition (ISBN: 978-197836229). The Home Edition contains an answer key section. Teachers who want to recommend our Review Book to their students should recommend the Home Edition. Students and parents whose school is not using the Review Book as instructional material, as well as homeschoolers, should buy the Home Edition. The School Edition does not have answer key in the book. A separate answer key booklet is provided to teachers with a class order of the book. Whether you are using the school or Home Edition, our E3 Chemistry Review Book makes a great supplemental instructional and test prep resource that can be used from the beginning to the end of the school year. PLEASE NOTE: Although reading contents in both the school and home editions are identical, there are slight differences in question numbers, choices and pages between the two editions. Students whose school is using the Review Book as instructional material SHOULD NOT buy the Home Edition. Also available in paperback print.

Year after year CISCE has been introducing changes in the curriculum of various classes. We, at Oswaal Books, closely follow every change made by the Board and endeavor to equip every student with the latest study material to prepare for the Final Examinations. The latest offering from us are these Worksheets. They are entirely based on the Latest Syllabus & Question Paper Design issued by the Board for Academic Year 2019-2020. These aim at providing comprehensive practice material for every chapter to ensure that every concept is revised in totality. These are prepared by experienced teachers who have translated their expertise into making these worksheets a wholesome study package. Every worksheet contains a mix of questions, for which the maximum marks and time are mentioned to create an exam-oriented study material. Our worksheets strictly follow the CISCE Syllabus and include the following: • Chapter-wise pullout worksheets with ample space for writing answers • All Typologies of Questions specified by the Board for the specific classes. • Previous Years Questions for effective exam preparation • Solutions can be downloaded free from our website www.oswaalbooks.com

This book illustrates how models of chemical reactors are built up in a systematic manner, step by step. The authors also outline how the numerical solution algorithms for reactor models are selected, as well as how computer codes are written for numerical performance, with a focus on MATLAB and Fortran. Examples solved in MATLAB and simulations performed in Fortran are included for demonstration purposes.

• NEET Topic-wise Solved Papers CHEMISTRY contains the past year papers of NEET, 1988 to 2017 distributed in 31 Topics. • The Topics have been arranged exactly in accordance to the NCERT books so as to make it 100% convenient to Class 11 & 12 students. • The fully solved CBSE Mains papers of 2011 & 2012 (the only Objective CBSE Mains paper held) have also been incorporated in the book topic-wise. • The book also contains NEET 2013 along with the Karnataka NEET 2013 paper. • The detailed solutions of all questions are provided at the end of each chapter to bring conceptual clarity. • The book contains around 1600+ MILESTONE PROBLEMS IN PHYSICS.
