As thrilling as any novel, as taut and exciting as any adventure story, Peter Hathaway Capstick's Death in the Long Grass takes us deep into the heart of darkness to view Africa through the eyes of one of the most renowned professional hunters. Few men can say they have known Africa as Capstick has known it--leading safaris through lion country; tracking man-eating leopards along tangled jungle paths; running for cover as fear-maddened elephants stampede in all directions. And of the few who have known this dangerous way of life, fewer still can recount their adventures with the flair of this former professional hunter-turned-writer. Based on Capstick's own experiences and the personal accounts of his colleagues, Death in the Long Grass portrays the great killers of the African bush--not only the lion, leopard, and elephant, but the primitive rhino and the crocodile waiting for its unsuspecting prey, the titanic hippo and the Cape buffalo charging like an express train out of control. Capstick was a born raconteur whose colorful descriptions and eye for exciting, authentic detail bring us face to face with some of the most ferocious killers in the world--underrated killers like the surprisingly brave and cunning hyena, silent killers such as the lightning-fast black mamba snake, collective killers like the wild dog. Readers can lean back in a chair, sip a tall, iced drink, and revel in the kinds of hunting stories Hemingway and Ruark used to hear in hotel bars from Nairobi to Johannesburg, as veteran hunters would tell of what they heard beyond the campfire and saw through the sights of an express rifle.

Churches committed to following Christ's example want to see this world changed for the sake of eternity. While the supernatural component of making that happen goes without saying, how does a body of believers do its part to be in that "sweet spot" where true spiritual transformation can occur? In Transformational Church, bestselling research authors Thom S. Rainer and Ed Stetzer have surveyed fifty thousand down to five hundred congregations in search of the qualitative answer. Their book contains a wealth of indispensable new data, nuanced insights, and clear how-to guidance, all centered on this key finding: Transformational churches make disciples whose lives are being transformed by the gospel so that people engage the culture around them for its ultimate transformation. Deeply committed to the essential foundations of discipleship (worship, community, and mission), transformational churches practice their faith and make disciples through vibrant leadership, prayerful dependence upon God, and relational intentionality. And they do so paying mind to their unique context and with a missionary mindset. The most comprehensive study of the American church to date.

Jonathan Nossiter, acclaimed filmmaker and former sommelier, had his first taste of wine at the age of three in Paris, from his father's fingertip. For him, wine is "memory in its most liquid and dynamic form," as essential an expression of culture as cinema, books, baseball, painting, even sex. With great wit and passion, he celebrates wine and its enthusiasts--and defends both from those who tell us what to drink and how to think about it. In Liquid Memory, the American expatriate investigates the infinite mysteries of terroir, the historical sense of place that makes wine a living, thrilling expression of cultural identity that can stretch back centuries. The book is a deliriously joyful master class in locating the soul of a wine, and in learning to trust your own palate and desires. Nossiter, who has already created an uproar in the world of wine with his film Mondovino, arms us against the tyranny of snobs, critics, and charlatans who would prevent us from taking part in what should be a gloriously democratic bacchanalia. From the sacred wine shops and three-star restaurants of Paris to the biodynamic vineyards of Burgundy, from the hipster bistros of New York to film locations in Rio de Janeiro and Athens, this singular journey invites us to consider how power, misused, can sometimes mask an absence of taste--and how our own personal taste can combat power in any sphere. A controversial bestseller in Europe, Liquid Memory is sure to rile the establishment, enlighten the thirsty, and reveal the inner life of the world's most mysterious, contradictory, and jubilatory drink.

The principles of Six Sigma are being used in nearly every industry to reduce waste and improve performance. However, most books on the subject are written only for those in manufacturing, and specifically for engineers or those with a high level of technical expertise. Meanwhile those working in offices receive little or no information on how to use Six Sigma in their environments. Now best-selling author Rod Munro has written a convenient book explaining the tools of Six Sigma, specifically tailored to those in the office. Six Sigma for the Office: A Pocket Guide is a convenient guide for anyone working on Six Sigma projects in non-manufacturing environments. Specifically written for those at the green belt level, this book will help explain the Six Sigma tools and show how they apply to those working in an office. all of the examples in the book are taken from the office environment, so office workers will easily identify and be able to apply these tools in their own jobs. In DEMAND: Giving People What They Love Before They Know They Want It (Crown Business; October 2011), Adrian Slywotzky, named by Industry Week one of the world's six most influential management thinkers, provides a radically new way to think about demand, with a big idea and a host of practical applications--not just for people in business but also for social activists, governments leaders, non-profit managers, and other would-be innovators. They all need to master such ground-breaking concepts as the hassle map (and the secrets of fixing it); the curse of the incomplete product (and how to avoid it); why very good = magnetic; how what you don't see can make or break a product; the art of transforming fence sitters into customers; why there's no such thing as an average customer; and why real demand comes from a 45-degree angle of improvement (rather than the five degrees most organizations manage).
