The Longman Textbook Readerenables instructors to supplement their main textbook with sample chapters drawn from college textbooks. Six full textbook chapters drawn various disciplines offer students more practice with actual college material and prepare them for readings they will encounter in later semesters. Each chapter includes additional comprehension quizzes, critical thinking questions, and group activities to help students develop schema and to reinforce their learning.

The importance of critical thinking has surged as academics in higher education realize that many students, upon entering college, lack the critical thinking skills necessary to succeed. While much has been written regarding the 'lack' of critical thinking, less has been written on the success of methods implemented to develop this fundamental skill. The Handbook of Research on Advancing Critical Thinking in Higher Education explores the effective methods and tools being used to integrate the development of critical thinking skills in both undergraduate and graduate studies. Due to the difficulties associated with teaching critical thinking skills to learners of any age, this publication is a crucial addition to the scholarly reference works available to pre-service and early career teachers, seasoned educational professionals, professors across disciplines, curriculum specialists, and educational administrators.

Most global businesses focus nearly all their efforts on selling to the wealthiest 14% of the world's population. It's getting harder and harder to make a profit that way; these markets are oversaturated, overcompetitive, and declining. The Invisible Market shows how to unleash new growth and profitability by serving the other 86%. Vihajan Mahajan offers detailed strategies and implementation techniques for product design, pricing, packaging, distribution, advertising, and more. Discover radically different 'rules of engagement' that make emerging markets tick, and how European and Asian companies are already driving billions of dollars in sales there. Mahajan shows how to understand and manage lack of infrastructure and media, low literacy levels, and 'unconventional' consumer behavior. Learn how to redefine the 'real' competition; tap into the informal economy and unconventional channels; leverage expatriate word-of-mouth; pool demand to reach critical mass; piggyback innovations on local tradition; and price and package to reflect local realities. As traditional markets become increasingly unprofitable, emerging markets become the #1 opportunity for growth.
