Petascale Computing

Algorithms and Applications:

Bader

Petascale Computing:
Algorithms and Applications,
edited by David A. Bader
(Chapman & Hall/CRC, 2007),
is the first book in CRC's
Computational Science
Series, edited by Horst
Simon at Lawrence Berkeley
National Lab. Although the
book is a collection of
papers, Bader has done an
excellent job of creating a
compilation that holds
together and covers a broad
topic very well.

Petascale Computing

This book provides state-of-the-art and interdisciplinary topics on solving matrix eigenvalue problems, particularly by using recent petascale and upcoming post-petascale supercomputers. It gathers selected topics presented at the International Workshops on Eigenvalue Problems: Algorithms; Software and Applications, in Petascale Computing (EPASA2014 and EPASA2015), which brought together leading researchers working on the numerical solution of matrix eigenvalue problems to discuss and ...
