This volume describes state-of-the-art protocols that serve as “ recipes ” for scientists concentrating on fibrosis research. This book is divided into four sections. Part I focuses on animal models of fibrosis and covers topics such as mimicking fibrosis in the lungs, skin, liver and heart, and generating transgenic mouse models. Part II discusses cell culture systems, where the chapters explore cell types important for the development of fibrosis. Part III looks at the purification, quantification, and analysis of the ECM proteins, and Part IV describes computer-assisted methods such as quantifying fibrillar collagen alignment and exploring the nano-surface of collagen with atomic force microscopy (AFM). Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and practical, Fibrosis: Methods and Protocols is a valuable resource aimed at outstanding quality and repeatability of research experiments in the fibrosis field.

This book focuses on research developments, models, and practical applications of animal-assisted interventions for diverse populations who have experienced trauma. Physiological and psychological trauma is explored across three broad areas: 1) child maltreatment and family violence; 2) acute and post-traumatic stress, including that which is associated with military service, war, and developmental trauma; and 3) times of crisis, such as natural disasters and the ever-increasing risks associated with climate change, community violence, terrorism, and periods of personal loss and grief. Contributing authors, who include both national and international experts in the fields of human-animal connection and trauma, discuss how our relationships with animals can help build resiliency and foster healing to transform trauma and trauma response.

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

A beautiful book that not only helps families develop traditions based on the significance of Thanksgiving, but also builds a foundation of gratefulness in their lives.

From New York Times bestselling knitting writer Clara Parkes, comes a new collection of essays and stories drawn from the yarn-loving, stash-collecting, close-knit community of knitters. This addictive-to-read anthology celebrates yarn—specifically, the knitter ’ s reputation for acquiring it in large quantities and storing it away in what ’ s lovingly referred to as a “ stash. ” Consider contributions from knitting and teaching luminaries, including: Stitch ’ n Bitch co-founder Debbie Stoller Meg Swansen, daughter of master knitter Elizabeth

Zimmermann Knitting blogger and author Susan B. Anderson alongside offerings from knitting greats Amy Herzog, Stephanie Pearl-McPhee, and Franklin Habit—plus, stories from a romance novelist, an illustrator, a PhD-wielding feminist publisher, a globetrotting textile artist, a licensed clinical social worker, and the people behind the world's largest collective online stash, Ravelry.com. The pieces range from comical to earnest, lighthearted to deeply philosophical as each seeks to answer the question of how the stash a knitter has accumulated over the years reflects his or her place in universe. The stories in *A Stash of One's Own* represent and provide validation for knitters' wildly varying perspectives on yarn, from holding zero stash, to stash-busting, to stockpiling masses of it—and even including it in estate plans. These tales are for all fiber artists, spinners, dyers, crafters, crocheters, sheep farmers, shop owners, beginning knitters to yarn experts, and everyone who has ever loved a skein too hard to let it go.

What has changed in the last twenty-five years in the relationship of Poles with their dogs? How have the free market and capitalism influenced Poland and the human-canine bond there? Are dogs "property," "friends," or "members of the family" in post-communist Poland? *Free Market Dogs*, edited by Michał Piotr Pręgowski and Justyna Włodarczyk, examines the interactions and relationships of dogs and humans in contemporary Polish culture and society, and explores how Poland's intense exposure to Western—and particularly American—cultural patterns influenced the status of dogs after restoration of democracy in 1989. This book discusses topics such as the emergence of pet cemeteries, dog memoirs, and presidential dogs in Poland; the growing popularity of dog sports and the feminization of said sports; the philosophical and ideological changes in dog training caused by exposure to state-of-the-art methods from American books and videos; dogs in contemporary Polish art; and the specificity and growing pains of local pet-facilitated therapy. *Free Market Dogs* was written by researchers and practitioners whose academic background includes sociology, anthropology, pedagogy, cultural studies, and literary studies, and whose practical experience involves either training dogs or working with them. Based on thorough research and personal expertise, this is a great book for anyone interested in human-canine relationships—and their similarities and differences—around the world.

Most people with disabilities will experience some form of abuse during their lives. Studies constantly show that individuals with disabilities are significantly more likely to be physically or sexually abused than people without disabilities. As people with disabilities are integrated into all aspects of community life, the prevalence of abuse and the potential for society's violent tendencies toward these individuals cannot be minimized. To better protect their rights and dignity, easy availability of information about violence and abuse is more essential than ever.
