How to Sharpen a Reel Mower

There are two critical parts of a  
mower: the blades and the bed  
knife. The rest of the mower  
exists to support these two parts.  
Wheels drive a gear that spin the  
blade mechanism, which consists  
of a series of 5 to 7 blades  
mounted in a helical fashion.

Sharpening compound is a gritty substance that is applied to the blades and sharpens the beveled edges of the blades as they scrape against each other. To sharpen your tool with a lapping kit, attach the handle to the driving gear of your reel mower and use a paint brush to apply the sharpening compound to all of the blades.

How to backlap sharpen a Gardena  
Reel Mower - YouTube

Give your mower a new life. This  
product works wonders on almost  
any brand of reel mower. You just  
need to be aware that you need to  
re-adjust the blade clearance while  
sharpening, and after you are  
done, as the cutting surface will  
obviously get ground in the  
process. Be careful when removing  
the E ring as it can fly off and land  
somewhere where you will never  
find it again.
