A lively, immersive history by an award-winning urbanist of New York City's transformation, and the lessons it offers for the city's future. Dangerous, filthy, and falling apart, garbage piled on its streets and entire neighborhoods reduced to rubble; New York's terrifying, if liberating, state of nature in 1978 also made it the capital of American culture. Over the next thirty-plus years, though, it became a different place—kinder and meaner, richer and poorer, more like America and less like what it had always been. *New York, New York, New York*, Thomas Dyja's sweeping account of this metamorphosis, shows it wasn't the work of a single policy, mastermind, or economic theory, nor was it a morality tale of gentrification or crime. Instead, three New Yorks evolved in turn. After brutal retrenchment came the dazzling Koch Renaissance and the Dinkins years that left the city's liberal traditions battered but laid the foundation for the safe streets and dotcom excess of Giuliani's Reformation in the '90s. Then the planes hit on 9/11. The shaky city handed itself over to Bloomberg who merged City Hall into his personal empire, launching its Reimagination. From Hip Hop crews to Wall Street bankers, D.V. to Jay-Z, Dyja weaves New Yorkers famous, infamous, and unknown—Yuppies, hipsters, tech nerds, and artists; community organizers and the immigrants who made this a truly global place—into a narrative of a city creating ways of life that would ultimately change cities everywhere. With great success, though, came grave mistakes. The urbanism that reclaimed public space became a means of control, the police who made streets safe became an occupying army, technology went from a means to the end. Now, as anxiety fills New Yorker's hearts and empties its public spaces, it's clear that what brought the city back—proximity, density, and human exchange—are what sent Covid-19 burning through its streets, and the price of order has come due. A fourth evolution is happening and we must understand that the greatest challenge ahead is the one New York failed in the first three: The cures must not be worse than the disease. Exhaustively researched, passionately told, *New York, New York, New York* is a colorful, inspiring guide to not just rebuilding but reimagining a great city.

To lift and keep millions out of poverty requires that smallholder agriculture be productive and profitable in the developing world. Do we know how to make this happen? Researchers and practitioners still debate how best to do so. The prevailing methodology, which claims causality from measures of statistical significance, is inductive and yields contradictory results. In this book, instead of correlations, Isabelle Tsakok looks for patterns common to cases of successful agricultural transformation and then tests them against other cases. She proposes a hypothesis that five sets of conditions are necessary to achieve success. She

concludes that government investment in and delivery of public goods and services sustained over decades is essential to maintaining these conditions and thus successfully transform poverty-ridden agricultures. No amount of foreign aid can substitute for such sustained government commitment. The single most important threat to such government commitment is subservience to the rich and powerful minority.

Presents the findings of Canada's Youth in Transition Survey, which complements OECD's PISA survey and offers significant new policy insights in understanding students' choices at different ages and the impact of these decisions on consequent education and labour market outcomes.

IZA World of Labor distils and condenses the best thinking and research on labor economic issues to enable decision-makers make better informed policy decisions. Written by well-known labor economists worldwide, the findings on each topic are presented in a compact and readable format, as distillations of comprehensive evidence-based research. The IZA World of Labor Policy Handbook brings together summaries of over one hundred research articles to give busy policy-makers and advisors worldwide instant access to reliable, and up-to-date guidance on key policy topics including: migration and immigration; the minimum wage; supporting an aging workforce; the gender pay gap; microfinance in developing countries.

Roberts makes the case that this may be the greatest time in history to start a business! Using Roberts' strategies and principles in this book, learn how to become "UNEMPLOYABLE!" your entire life! Most of us are taught to get a good education and a good job. The idea that we should be content to have someone else dictate our daily commute, our income, schedules and vacations is the accepted norm. To some, the idea of life in a cubicle eight hours a day is akin to torture! What does it really take for someone to jump off the employment treadmill and participate in the free enterprise system, unencumbered by traditionally accepted myths?

The revolutions that have taken place around the world during the last fifty years—the ousting of Marcos and the Shah of Iran; the fall of communist regimes in Eastern Europe; the end of Apartheid in South Africa and, indeed, the civil rights revolution in America—were fundamentally urban revolutions. They were the revolutions of Manila, Teheran, Gdansk, Leipzig, Berlin, Johannesburg and Detroit, muscular assertions of new classes of city-dwellers intent on ending their marginalization as they struggled to build their new livelihoods, freedoms and communities in cities. In *Welcome to the Urban Revolution*, Jeb Brugmann argues that the city itself had become our era's medium for revolutionary change: not only political, but technological as well. Though we think of them as a hotbed for poverty and crime, cities are not just a source of problems and conflict. They can also be a source of solutions to the major problems of our day: poverty, social inequality and environmental sustainability. In *Welcome to the Urban Revolution* Brugmann will show what is unique and important about cities and how they grow, the ways global issues are being solved in individual cities, and how real people are living with urban migration day in and day out.
